The application has been amended as follow:

In the claims,

Claim 40

Line 2, change "verifying generated commands used in a computer system, the system comprising" to - - verifying generated commands that stored, and used by a processor, in a computer system, the system comprising - -.

Claim 41

Claims 29-36, 38-45, 47-54, 56-58, 60-62 and 64-66 are meet the requirement of 35 USC 101.

Therefore, claims are statutory (i.e., page 9, lines 5-8 of the instant application).

The following is an examiner's statement of reasons for allowance:

With respect to the independent claims 31, 40 and 49, the claimed features "recording said subset of first switch commands in a log file, said first switch commands being associated with at least one switch type; sorting said subset of said first switch commands by switch type; and for a switch type in said log file, determining whether said data used by said second system corresponds to first switch commands associated with said switch type, wherein a correspondence between said data and said first switch commands is indicative of said second system being capable of generating at least one second switch command equivalent to first switch commands associated with said switch type" in conjunction with other elements of the independent claims are not suggested, anticipated or found to be obvious over the prior art made of record. With respect to the independent claims 32, 41, 50, 56, 60 and 64, the claimed features "said first switch commands is indicative of said second system being capable of generating at least one second switch command equivalent to a first switch command included in said subset; including at least one portion of said data used by said second system into at least one hash table, said at least one portion based on said list of switch identifiers" in conjunction with other elements of the independent claims are not suggested, anticipated or found to be obvious over the prior art made of record.

The dependent claims, being definite, further limiting, and fully enabled by the specification are also allowed.

Art Unit: 2162

The closest prior art, Cornell et al., USPTNo. 4,599,490 relates to a telecommunication switch controller adapted to generate and receive the primitive commands analyzes the digits of an incoming call entering the system on an incoming trunk and destined for a terminating mobile unit.

Glaser et al., USPTNo. 5,875,242 relates to a novel telecommunications installation and management system and method for installing and managing a telecommunications switch but fail to teach the above limitations

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
